

LEED* for New Construction & Major Renovations, 2009 v4

Applies to: All Products by Architectural Louvers

MR Credit 2 – Construction Waste Management

The primary component in our products is 100% recyclable aluminum type 6063-T5, 6063-T52, or 6061-T6. This contributes toward the goal for MR Credit 2.

MR Credit 4 – Recycled Content

The aluminum materials used in our products contain 39.1% pre-consumer recycled content and 19.1% post-consumer recycled content, which equates to a total recycled content of 38.7% per the LEED calculation procedure.

(post-consumer plus ½ pre-consumer)
 $19.1\% + (1/2 * 39.1\%) = 38.7\%$

This contributes toward the goal for Credit MR Credit 4.

MR Credit 5 – Local/Regional Materials

Location for sales, manufacturing, and distribution of products is:

Architectural Louvers
266 West Mitchell Ave
Cincinnati, OH 45232

Projects located within 500 miles of this location are eligible for a contribution toward local manufacturing goal for MR Credit 5.

Applies to: Sunshade Louvers by Architectural Louvers

IEQ Credit 8 - Daylight and Views

Achieve 75% daylight of building perimeter area while including glare control and minimizing solar heat gain. This contributes toward the goal for IEQ Credit 8.
